STO DGO, DR

Dear Mr. / Ms.

## ABOUT ME

I'm a professional software developer with bachelor degree in Software Development from UTESA (Universidad Tecnologica de Santiago, DR). I have more than 8 years of experience working on different applications already crafted as well as from scratch. In my spare time, I like to play basketball and review coding in the internet to improve my development skills.

## WHY ME?

I can assure you that I can be a really good asset for your company's development of any software you have in mind, as well as being consultant in order to boost your business. As I said I have worked from database construction to front-end view using different tools with an outstanding analysis covering all tasks necessary to build a great software. In short, I can adapt to any development environment.

*"hardworking has its reward"*

Sincerely

**Héctor García**
