Dear Mr. / Ms.

I am a passionate Full Stack Web Software Developer with five years of experience in National/International companies along the commercial and financial sector.

I have always thought in doing my best, I don't like my software return to me when it's in Q&A department. I secure my commit will be working and optimized for the application I developed.

I have worked from database construction to the front-end view using different tools what doing my work more interesting:

1. SSIS/SSRS (Reporting and Integration Services).
2. SQL SERVER.
3. C# .NET CORE MVC/WEB API
4. ANGULARJS / ANGULAR

In short, I adapt to any software development platforms.

"The hard work in anytime have its reward"

Sincerely
Héctor García

Hector Francisco
Garcia Lara
Full-Stack Web Software Developer

💼 WORK EXPERIENCE

2015-PRESENT

Software Developer
At Banco de Reservas   📍 Santo Domingo, Dominican Republic

2010	●	**Individual Recognition - Administration and Finances** At Quala SA 📍 Sto Dgo, Dominican Republic
2011	●	**Best Team** At Quala SA 📍 Sto Dgo, Dominican Republic

🛠 Tools I Can Manage

How I said above, I'm able to use many development's platforms, but there are I can really manage day by day:

Frontend Development

As principal tool I use is Angular 4 / AngularJS, It gives me all what I need with others third parts components (DevExpress/PrimeNG/JQuery/Jasmine) to develop any software.

Backend Development

As principal tool I use is Visual Studio ASP.NET **MCV/WEB API** with SQL SERVER x Version, also SSIS/SSRS (Integration/Reporting Services).
